

Consultant- Histopathology

Conceptualized in the year 2004 as a philanthropic initiative for the Eastern and North-Eastern parts of India and the neighbouring countries, the Tata Medical Center (TMC) started operations in Kolkata on May 16, 2011. The hospital is governed by a charitable trust – Tata Medical Centre Trust. It is an integrated Oncology facility with well-trained professional staff and equipped with modern facilities and the most contemporary medical equipment. The hospital was designed by Cannon Design, a renowned architectural firm from North America. It is located on 13 acres of land at New Town in Kolkata, West Bengal.

The hospital is an integrated Oncology facility with well-trained professional staff and equipped with modern facilities and contemporary medical equipment. The Hospital, with a capacity of 437 beds, serves all sections of the society, with 75% of the infrastructure earmarked for subsidized treatment for the underprivileged sections. It provides a wide spectrum of services from diagnosis and therapy to rehabilitation and palliative support. The Institution's objective is to excel in service, education and research.

Tata Medical Center, Kolkata, has strived to be one of the leading cancer care and research institutions in the country and has benefited West Bengal as well as the adjoining states and neighbouring countries.

TMC is also running many academic programmes and has entered into institutional collaborations in education, research, and outreach programmes in the field of interdisciplinary medical, research and technology

The hospital is fully networked and has a robust hospital management system and electronic medical records for patient care.

About the Division of Histopathology & Cytopathology:

The Pathology services and facilities at the Tata Medical Center, Kolkata are amongst the best in the country. The Department has Divisions of Histopathology & Cytopathology, Hematology, Molecular Pathology and Cytogenetics. The Histopathology Division is a state-of-the-art facility with complete automated processing and staining platforms. In addition to the conventional automated H & E staining, there are 3 Leica Bond Max, 2 Roche Ventana and 1 DAKO automated immune-histochemistry stainers. The current load is around 15,000 tumor samples annually, which is increasing every year by 15 - 20 %. Regular Post-Doctoral Fellowship Program in Oncopathology and PDCC Oncopathology Program (ICP) are held. A large number of Observers from across the country come for training in Oncopathology. The department is the Eastern Regional Hub for DHR-ICMR supported DIAMONDS Project. The department is at the fore-front of academic publications, academic awards in National & International Conferences. The department participates in front-line collaborative research involving large extra-mural grants from national and international research organisations. It offers a stimulating environment to do high quality diagnostic oncopathology and research.

To fulfil the above objectives TMC Kolkata invites applications for the position of Senior/ Associate/ Junior Consultant - Histopathology.
