Application for the position of Research Assistant

Position: No. of positions: 3

**Appointing Organisation: Tata Translational Cancer Research Centre
Tata Medical Center, Kolkata**

The Tata Medical Center and the Tata Translational Cancer Research Centre

The Tata Medical Center (TMC) is a multispecialty institution for tertiary cancer care based in New Town, Kolkata. At TMC, clinical and research activities are integrated to provide state-of-the-art care for patients with cancer. This integration is enabled by the Tata Translational Cancer Research Centre (TTCRC), the research arm of TMC. TTCRC is within a dedicated academic space and spread over 3 floors. At TTCRC, a multidisciplinary team of clinicians, scientists, academics and industry professionals collaborate to develop a systems medicine approach in cancer research. This approach is focussed on developing innovative, indigenous, cost-effective and equitable strategies to improve cancer diagnosis; develop treatments that match disease characteristics and are adapted to treatment response; and, identify prognostic and predictive disease biomarkers. These strategies are multi-dimensional and involve an iterative pathway that include clinical studies, high-throughput laboratory investigations, computational strategies to integrate, analyse and model data, hypothesis-based pre-clinical studies and evidence-based translation of findings to clinical practice. For additional information on work at TTCRC, visit <https://tinyurl.com/TTCRC-systems-medicine> and <https://tinyurl.com/TTCRC-childhood-ALL>.

The Position

In this position, you will work as part of the Minimal Residual Disease (MRD) monitoring group at TTCRC. The group works directly with the Department of Cytogenetics, Tata Medical Center & Genomics at TTCRC and has close links with Tata Consultancy Services Life Sciences Division. There are ongoing national and international collaborative studies. It has a dedicated laboratory facility equipped with Illumina, Sanger and Nanopore sequencers and is an internationally accredited centre for the minimal residual disease detection in childhood ALL. A dedicated informatics supports data analyses. This group is focussed on monitoring MRD for childhood ALL patients using both PCR and high-throughput technologies. Your primary responsibility will be to continue the existing workflow, and to further optimize the high-throughput platform that includes hands-on experiments and data analysis. This will involve working closely with the hospital's multidisciplinary clinical service, the biorepository unit and with colleagues in the ALL cancer biology group. The post holder will have a designated desk and computer.

Minimum required qualifications/experience

(a) M.Sc (with 0-4 years of experience) in Biological Sciences with expertise in Molecular Biology and Genomics

- (b) Expertise in DNA extraction, qPCR, Sanger Sequencing, NGS (preferable)
- (c) Soft skills: MS Office, Laboratory and clinical data management, Data analysis tools (PRISM)

Necessary qualities

- (a) Integrity, motivation, enthusiasm, responsibility and reliability
- (b) Focus and commitment in carrying out tasks and duties
- (c) Critical analytical and problem-solving skills, capable of independent work
- (d) Ability to work effectively as part of a multidisciplinary team

Appointment and reporting

Appointment to the position will initially be for 3 (three) years. The first year is probationary Confirmation in the position and progression to year 2 and 3 will be subjected to satisfactory review of performance through periodic appraisals. Appraisals will also determine salary increments and promotions. The consolidated monthly salary would be commensurate with qualifications and experience. The person would directly report to the group lead.
