

Fellow – Digestive Diseases

The Tata Group has always believed in returning wealth to the Society it serves. It has established philanthropic trusts which have created National Institutions in Science and Technology, Medical Research, Social Studies and the Performing Arts.

Tata Medical Center (TMC), Kolkata, is a philanthropic initiative from the House of Tata. Its mission is to promote prevention of cancer, to provide facilities for early diagnosis, treatment, rehabilitation and palliation to cancer patients, and to do research in cancer. The hospital is a comprehensive Cancer Care Center with well-trained professional staff and equipped with modern facilities and contemporary medical equipment.

This Institution has been set up at New Town in the Rajarhat area of Kolkata on 13 acres of land and is managed by a professional management body reporting to the Tata Medical Centre Trust (TMCT). The hospital started operations on 16th May 2011. The Hospital, with a capacity of 183 beds, serves all sections of the society, with 50% of the infrastructure earmarked for subsidized treatment for the underprivileged sections. The Institution's objective is to excel in service, education and research.

This state-of-the-art Hospital has been built on carefully landscaped grounds to emphasize the holistic approach in our crusade against cancer. The buildings were designed by Cannon Design, a renowned architectural firm from North America.

Diagnosis and treatment are characterized by a multi-disciplinary approach with Disease Management Teams, wherein experts from different streams participate in decision-making for treatment protocols, using evidence-based medical strategies and appropriate documented clinical guidelines.

Tata Medical Center, Kolkata, has strived to be one of the leading cancer care and research institutions in the country and has benefited West Bengal as well as the adjoining states and neighbouring countries.

About Department:

The Digestive Diseases department at the Tata Medical Center is a referral center for GI Malignancies. Benign cases are also seen and managed in the OPD. The unit performs all types of basic diagnostic (Gastroscopy, Colonoscopy) and advanced therapeutic endoscopic procedures (ERCP, EUS, endo-luminal stenting, endoscopic-mucosal resection). The department functions closely with the Department of GI Surgery, Interventional Radiology and Nutrition. There is a weekly GI multi-disciplinary team meeting where all cases are discussed. The endoscopic suite at the TMC is equipped with the latest Olympus equipment.

Course Content:

The fellow will get an opportunity to learn all basic and advanced therapeutic endoscopic procedures. He will attend all the Gastroenterology OPDs. He will be a part of the on-call roster for in-patients and shall be required to be on-site during those times. The fellow will be supported to attend at least one national conference in a year. He will be encouraged to do research and participate in academic activities during his tenure at the TMC.

To fulfill the above objectives TMC invites applications for **Fellowship in Digestive Diseases**.

Eligibility: MD/DNB in Medicine

Duration: One Year.
