

Consultant- Head & Neck Surgery

Conceptualized in the year 2004 as a philanthropic initiative for the Eastern and North-Eastern parts of India and the neighboring countries, the Tata Medical Center (TMC) started operations in Kolkata on May 16, 2011. The hospital is governed by a charitable trust – Tata Medical Centre Trust. It is an integrated Oncology facility with well-trained professional staff and equipped with modern facilities and the most contemporary medical equipment. The hospital was designed by Cannon Design, a renowned architectural firm from North America. It is located on 13 acres of land at New Town in Kolkata, West Bengal.

The hospital is an integrated Oncology facility with well-trained professional staff and equipped with modern facilities and contemporary medical equipment. The Hospital, with a capacity of 437 beds, serves all sections of the society, with 75% of the infrastructure earmarked for subsidized treatment for the underprivileged sections. It provides a wide spectrum of services from diagnosis and therapy to rehabilitation and palliative support. The Institution's objective is to excel in service, education and research.

Tata Medical Center, Kolkata, has strived to be one of the leading cancer care and research institutions in the country and has benefited West Bengal as well as the adjoining states and neighbouring countries.

TMC is also running many academic programmes and has entered into institutional collaborations in education, research, and outreach programmes in the field of interdisciplinary medical, research and technology

The hospital is fully networked and has a robust hospital management system and electronic medical records for patient care

The Department of Head and Neck Surgery is presently manned by three specialist head and neck oncosurgeons experienced to handle complex head and neck ablative and reconstructive procedures. The gamut of surgical interventions range from routine oncologic procedures for head and neck cancer to robotic surgery for oropharyngeal cancer, carbon dioxide laser for laryngeal cancer and skull base surgery, both open and endoscopic.

The department works with active units for dental care and prosthetic rehabilitation and speech and swallowing rehabilitation.

Remarkable achievements of the Head & Neck Surgery department at Tata Medical Center are:

- First comprehensive center in Eastern India offering state of the art interdisciplinary care for head and neck cancer, including microvascular reconstruction
- Entire gamut of robotic procedures in Head and Neck Cancer
- Only center performing routine endoscopic remote access thyroidectomies and neck dissections
- Comprehensive Endoscopic Skull base surgery program

- Protocol based treatment algorithms including dental, prosthetic and speech and swallowing rehabilitation
- Laryngectomy club and peer support system

In order to fulfill additional needs and for phase-2 expansion, we are looking to appoint full time:
