

Technologist - CSSD

Conceptualized in the year 2004 as a philanthropic initiative for the Eastern and North-Eastern parts of India and the neighboring countries, the Tata Medical Center (TMC) started operations in Kolkata on May 16, 2011. The hospital is governed by a charitable trust – Tata Medical Centre Trust. It is an integrated Oncology facility with well-trained professional staff and equipped with modern facilities and the most contemporary medical equipment. The hospital was designed by Cannon Design, a renowned architectural firm from North America. It is located on 13 acres of land at New Town in Kolkata, West Bengal.

The Hospital, with a capacity of 437 beds, serves all sections of the society, with 75% of the infrastructure earmarked for subsidized treatment for the underprivileged sections. It provides a wide spectrum of services from diagnosis and therapy to rehabilitation and palliative support. The Institution's objective is to excel in service, education and research.

The purpose of a Central Sterile Supply Department (CSSD) is to make reliable sterilized articles available at the right time, place and condition. The Tata Medical Center-CSSD is equipped with the state-of-art equipments and a team of dedicated personnel.

The CSSD within a hospital receives, disinfects, sterilizes and distributes materials to all departments including the wards, outpatient departments [OPDs] and other special units such as operating theatres (OT) and Bone marrow transplant unit (BMTU). Major responsibilities of CSSD include processing and sterilization of surgical instrument, rubber materials [catheters, tubing], and dressings materials, etc. It is also responsible for economic and effective utilization of equipments and resources of the hospital.

The Tata Medical Center- CSSD figures prominently in the Scientific Operating Procedures for Sterilization Practices in India, a publication published in December 2012 (PSA/2012/1), prepared for the Office of the Principal Scientific Adviser to the Government of India. To fulfil the above objectives TMC invites applications for the following position:

Job description of the CSSD Junior Technologist:

- Receiving of instruments from wards and operation theatre after use
- Decontamination of used devices using manual and automated methods
- Inspection and functional testing of devices. Any discrepancies or faults to be reported immediately to the CSSD supervisor
- Assembly and packaging of devices for sterilization
- Loading and unloading of sterilizers
- Recording of relevant data in appropriate log books
- Distribution of processed devices to appropriate areas
- Safe handling and storage of cleaning and disinfection reagents
- Maintaining the cleanliness of the CSSD
- Ensure all wastes including biomedical wastes are disposed correctly in correct bins or color coded bags

Educational qualification:

Essential: Minimum 10+2 (Higher Secondary)

Desirable: Science background

Experience Required:

- Minimum 2 years of working experience in CSSD.

Additional Skills:

- Knowledge of work practices in any CSSD in a hospital
- Knowledge of CSSD equipment operation
- Appropriate use of personal protective equipments (P.P.E.)
- Good communication skill
- Ability to work flexibly and ability to work in a team

The remuneration will be commensurate with years of experience.
