

Clinical Research Fellow - Telemedical Follow-up Study

Position Overview

We are seeking a dedicated Clinical Research Fellow to join our team at Tata Medical Center, Kolkata for a 1-year position to support an innovative research project focused on telemedical follow-up with integrated electronic patient-reported outcomes for gynecological cancer patients receiving pelvic radiotherapy.

Duration

12-month fixed-term position

Qualifications

- MBBS or MD/DNB in Radiation Oncology
- Registration with appropriate medical council
- Strong interest in clinical research and telemedicine
- Experience with patient-reported outcomes assessment preferred
- Basic understanding of data collection and management

Key Responsibilities

- 1. Patient Recruitment and Follow-up**
 - Assist in recruiting eligible gynecological cancer patients for the prospective cohort study
 - Coordinate and conduct telemedical follow-up appointments
 - Ensure compliance with study protocols and ethical guidelines
- 2. Data Collection and Management**
 - Implement electronic patient-reported outcomes (ePRO) assessment tools
 - Collect, enter, and maintain study data with high accuracy
 - Assist in quality assurance of collected data
- 3. Clinical Coordination**
 - Liaise between patients and the multidisciplinary oncology team
 - Identify and escalate clinical issues arising during telemedical follow-up
 - Document patient experiences and clinical outcomes
- 4. Research Support**
 - Assist in literature reviews and research documentation
 - Contribute to interim and final analysis of study data
 - Help prepare progress reports and research presentations
- 5. Protocol Adherence**
 - Ensure compliance with institutional and international research standards
 - Maintain participant confidentiality and data security
 - Follow all ethical guidelines for human subjects research

Skills and Attributes

- Excellent communication skills with patients and healthcare professionals
- Strong organizational abilities and attention to detail
- Proficiency with electronic medical records and research databases
- Basic statistical knowledge and data analysis skills
- Ability to work independently and as part of a multidisciplinary team

Benefits

- Opportunity to contribute to innovative research in cancer survivorship care
- Experience in telemedicine implementation and patient-centered outcomes research
- Mentorship from experienced oncology researchers
- Potential for publication and presentation opportunities
- Professional development in clinical research methodology

Location

Tata Medical Center, 14 MAR, Newtown, Kolkata, 700160, India
