

## **Consultant- Plastic & Reconstructive Surgery**

Conceptualized in the year 2004 as a philanthropic initiative for the Eastern and North-Eastern parts of India and the neighboring countries, the Tata Medical Center (TMC) started operations in Kolkata on May 16, 2011. The hospital is governed by a charitable trust – Tata Medical Centre Trust. It is an integrated Oncology facility with well-trained professional staff and equipped with modern facilities and the most contemporary medical equipment. The hospital was designed by Cannon Design, a renowned architectural firm from North America. It is located on 13 acres of land at New Town in Kolkata, West Bengal.

The Hospital, with a capacity of 437 beds, serves all sections of the society, with 75% of the infrastructure earmarked for subsidized treatment for the underprivileged sections. It provides a wide spectrum of services from diagnosis and therapy to rehabilitation and palliative support. The Institution's objective is to excel in service, education and research.

The Department of Plastic surgery is presently involved in the microsurgical reconstruction of Head & Neck malignancies, skin & soft tissue malignancies, sarcoma, Gynaecological reconstructions and breast reconstruction amongst others. The department runs OPD from Monday to Friday, catering to a close of 340 patients each month. About 517 patients undergo reconstructive surgeries every year.

In order to fulfill the above requirements, we are looking to appoint full time:

- **Consultant - Plastic & Reconstructive Surgery**

### **Qualification:-**

M.Ch Plastic surgery /Dip NB Plastic surgery (which are post-doctoral courses) from any recognized University, **FRCS (Plastic Surgery) or equivalent qualification from any International University**

**Experience:** Minimum 2-3 years in Microsurgery experience after post doctorate qualification.

### **Job responsibilities:**

Job responsibilities of the consultant would include, reconstructive surgical care of the patients, wherever indicated, clinical management and pre and post-surgical care. Also to look into diagnostics, planning, intra and post-operative care and rehabilitation. Microsurgical reconstructions are highly skilled procedures involving a team of medical and paramedical staff. This team has built with tie and follows laid down protocols.
