

## CONSULTANT – RADIOLOGY & IMAGING

### **About Tata Medical Center:**

Conceptualized in the year 2004 as a philanthropic initiative for the Eastern and North-Eastern parts of India and the neighboring countries, the Tata Medical Center (TMC) started operations in Kolkata on May 16, 2011. The hospital is governed by a charitable trust – Tata Medical Centre Trust. It is an integrated Oncology facility with well-trained professional staff and equipped with modern facilities and the most contemporary medical equipment. The hospital was designed by Cannon Design, a renowned architectural firm from North America. It is located on 13 acres of land at New Town in Kolkata, West Bengal.

The hospital is an integrated Oncology facility with well-trained professional staff and equipped with modern facilities and contemporary medical equipment. The Hospital, with a capacity of 437 beds, serves all sections of the society, with 75% of the infrastructure earmarked for subsidized treatment for the underprivileged sections. It provides a wide spectrum of services from diagnosis and therapy to rehabilitation and palliative support. The Institution's objective is to excel in service, education and research.

Our patients and their families are our number one priority and we are proud to offer the whole spectrum of cancer care at our hospital: Opportunities to be involved in pioneering research and trials; Surgery, Radiology and Imaging services provided using state of the art technology, in the region; information and support offered to our patients and their families in the purpose built Cancer Information and Support Centre.

### **Department Description:**

Tata Medical Center is a comprehensive cancer care hospital with 437 beds. It has extensive laboratory and imaging services, day-care facilities and surgical services. The Department of Radiology and Nuclear Medicine has several stationary and portable X-ray and USG machines, two 64-slice PET-CT, one 128-slice dual energy CT, 2 MRI (3T) machines, a fully functional Cath Lab, gamma camera & SPECT, digital mammography and DEXA services. All modalities are connected by PACS, radiology reporting is done through RIS and clinical as well as laboratory data is available to view online through HMS. The department has 9 radiology consultants, 4 nuclear medicine consultants, 12 fellows. The department has considerable workload, with 13000 X-rays, 12000 diagnostic ultrasound exams including elastography and contrast enhanced USG, 6000 USG guided procedures 24000 CT scans, 2000 CT guided procedures, 7500 MRI examinations, 5000 mammographies and 450 Cath Lab procedures being done in a year approximately. Imaging study archive is available for viewing from 2011.

**Remarkable achievements** of the Radiology and Imaging department at Tata Medical Center are:

- Evidence-based medical care for cancer.
- Well known for cancer-related research over the last ten years, including multiple DBT funded research projects.

- Multiple abstracts and Publications in International meetings and Journals
