

SENIOR RESIDENCY IN GYNAECOLOGICAL ONCOLOGY

Conceptualized in the year 2004 as a philanthropic initiative for the Eastern and North-Eastern parts of India and the neighboring countries, the Tata Medical Center (TMC) started operations in Kolkata on May 16, 2011. The hospital is governed by a charitable trust – Tata Medical Centre Trust. It is an integrated Oncology facility with well-trained professional staff and equipped with modern facilities and the most contemporary medical equipment. The hospital was designed by Cannon Design, a renowned architectural firm from North America. It is located on 13 acres of land at New Town in Kolkata, West Bengal.

The hospital is an integrated Oncology facility with well-trained professional staff and equipped with modern facilities and contemporary medical equipment. The Hospital, with a capacity of 437 beds, serves all sections of the society, with 75% of the infrastructure earmarked for subsidized treatment for the underprivileged sections. It provides a wide spectrum of services from diagnosis and therapy to rehabilitation and palliative support. The Institution's objective is to excel in service, education and research.

Tata Medical Center, Kolkata, has strived to be one of the leading cancer care and research institutions in the country and has benefited West Bengal as well as the adjoining states and neighboring countries.

PHILOSOPHY OF THIS TRAINING PROGRAM:

For the treatment of women with gynaecological cancers the clinician needs to be able to make an accurate diagnosis with determination of the extent of the disease, with the best precision and competently perform advanced surgery, liaise with colleagues in other related departments to provide multidisciplinary care to the woman and be an excellent communicator for counselling the woman and her family members to assist them to comprehend the implications of the disease and participate in all decision making processes. A gynaecological oncologist should also be able to make contributions to the ever-expanding knowledge in this subspecialty through clinical and translational researches.
