

Application for the position of Bio Bank Technician at TTCRC (Tata Medical Center)

Last date of Application: 29/2/2020

TTCRC

The Tata Translational Cancer Research Centre (TTCRC) is an exciting new research institute being set up within TMC. TTCRC is creating a stimulating environment where clinicians, scientists and industry can work together to develop indigenous solutions for patients with cancer in India. As a new institute, the structure offers the unique opportunity for talented individuals to become leaders in the field of translational medicine within a relatively short span of time.

The Post

The post will provide support for bio banking and cutting edge laboratory research in genomics, molecular and cellular biology in the field of cancer. We will expect you to interface with the clinical and laboratory teams to enable translational research.

Training Offered

A wide variety of research work is on offer, both clinical and laboratory based.

Team Work and Supervision

The post holder will work within a team that will include themselves, other scientists and clinicians involved in developing biomarkers. Appointments have been made in genomics and proteomics and we expect you to work closely with these individuals. TTCRC works on a modular system with each focus group working independently. Team leaders have been appointed and will be responsible for your supervision.

What are we looking for?

- An energetic, enthusiastic individual capable of independent research
- A team player
- A vision for the future and a commitment to building a resource that will benefit patients with cancer in India

Job related knowledge/ aptitude, skills, etc.	Requirements	Essential / desirable	How identified
