

ICMR funded project entitled A Site Feasibility and Prospective Cohort Study of Hospitalized Adults and Children with Serious Bacterial Infection Caused by Carbapenem-Resistant Organisms, with Focus on Enterobacterales and/or Pseudomonas aeruginosa: an Observational Study

Application Valid Till: 21/3/2023

Conceptualized in the year 2004 as a philanthropic initiative for the Eastern and North-Eastern parts of India and the neighboring countries, the Tata Medical Center (TMC) started operations in Kolkata on May 16, 2011. The hospital is governed by a charitable trust – Tata Medical Centre Trust. It is an integrated Oncology facility with well-trained professional staff and equipped with modern facilities and the most contemporary medical equipment. The hospital was designed by Cannon Design, a renowned architectural firm from North America. It is located on 13 acres of land at New Town in Kolkata, West Bengal.

The hospital is an integrated Oncology facility with well-trained professional staff and equipped with modern facilities and contemporary medical equipment. The Hospital, with a capacity of 437 beds, serves all sections of the society, with 75% of the infrastructure earmarked for subsidized treatment for the underprivileged sections. It provides a wide spectrum of services from diagnosis and therapy to rehabilitation and palliative support. The Institution's objective is to excel in service, education and research.

Tata Medical Center, Kolkata, has strived to be one of the leading cancer care and research institutions in the country and has benefited West Bengal as well as the adjoining states and neighboring countries.

TMC is also running many academic programs and has entered into institutional collaborations in education, research, and outreach programs in the field of interdisciplinary medical research and technology.

To fulfil the above objectives Tata Medical Center at Kolkata invites applications for the Department of Infectious Diseases for the following positions with respect to the ICMR funded project entitled **"A Site Feasibility and Prospective Cohort Study of Hospitalized Adults and Children with Serious Bacterial Infection Caused by Carbapenem-Resistant Organisms, with Focus on Enterobacterales and/or Pseudomonas aeruginosa: an Observational Study"**
